Research Interest

I am an Assistant Professor in the Department of Computer Science at the University of Calgary. My research focus lies in the **intersection between human-computer interaction and robotics**. I have developed a novel tangible user interface made of swarm and soft robots, leveraging techniques from both robotics and HCI. The goal of my research is to *make the physical environment more adaptive and programmable with the distributed ubiquitous robots at all scales* (i.e., from mm- to m-scale).

keyword: tangible interface, swarm robots, soft robots, augmented reality
